DC Locations in UK, Germany, and Spain

Overall Water Risk

Description:

Overall water risk measures all water-related risks, by aggregating all selected indicators from the Physical Quantity, Quality and Regulatory & Reputational Risk categories. Higher values indicate higher water risk.

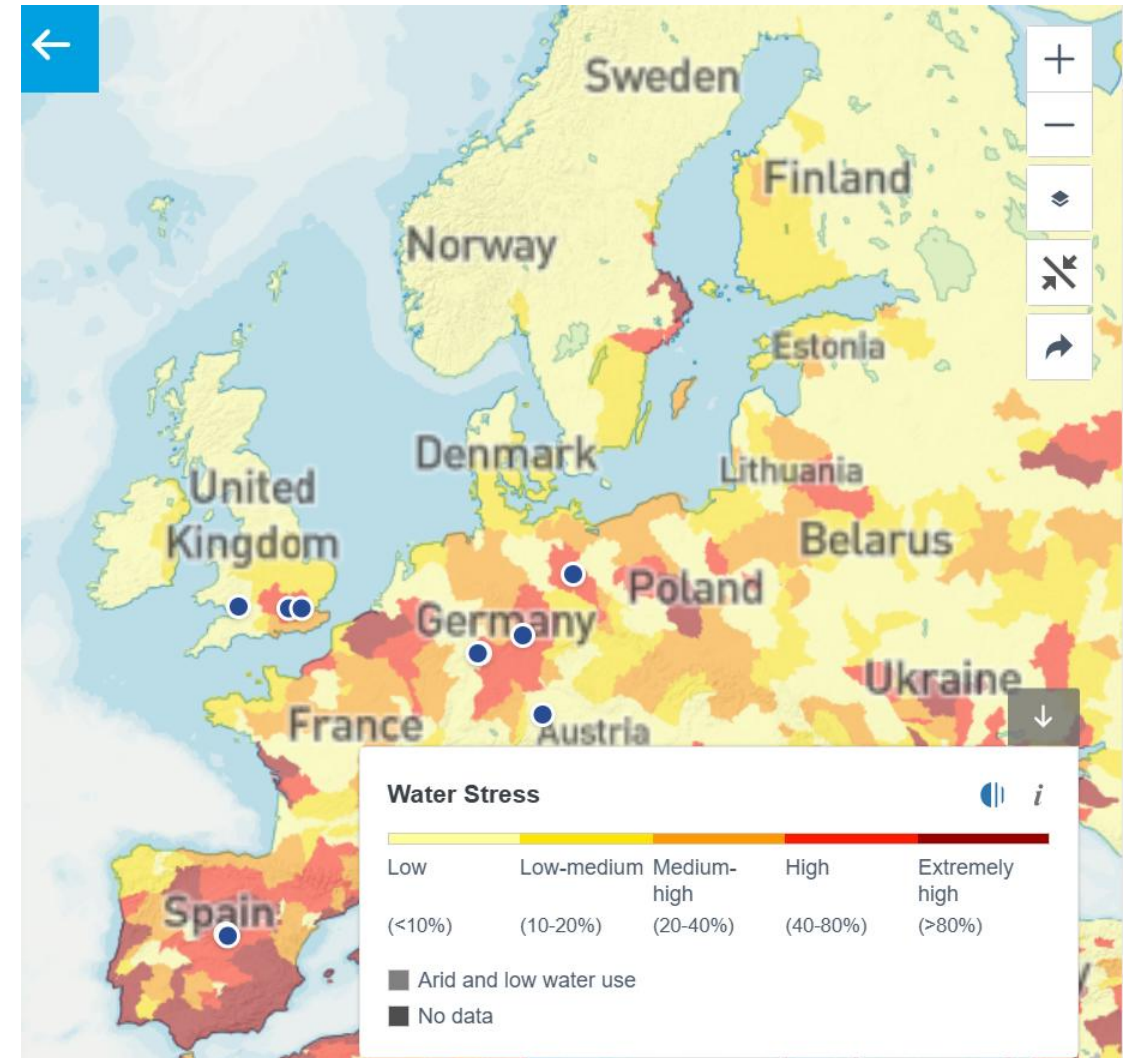

DC Locations in UK, Germany, and Spain

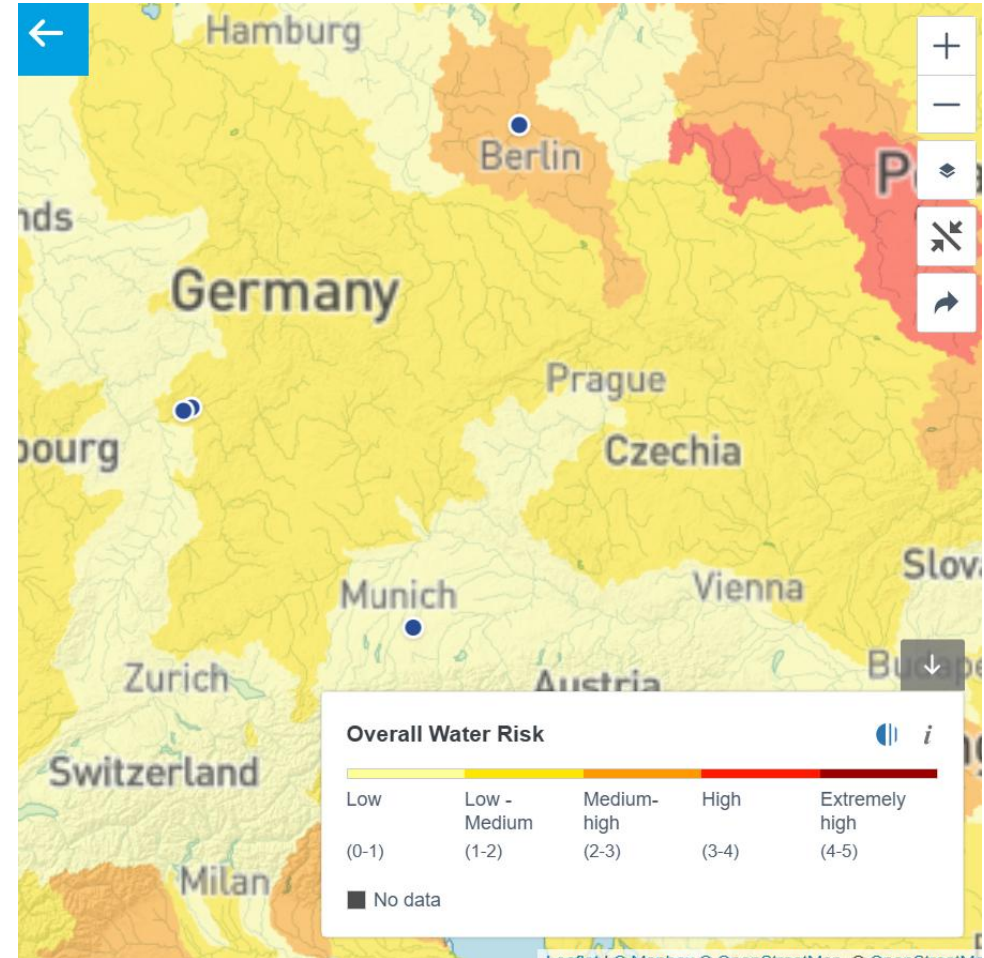

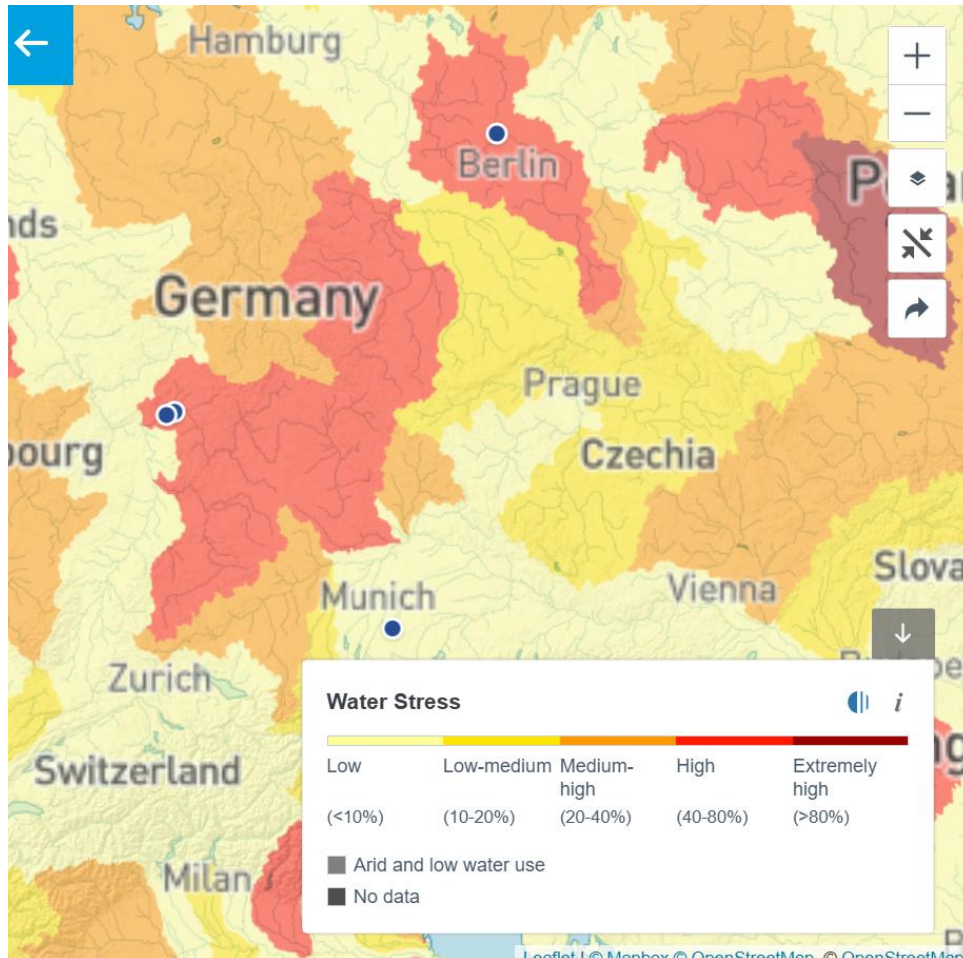

Water Stress

Description:

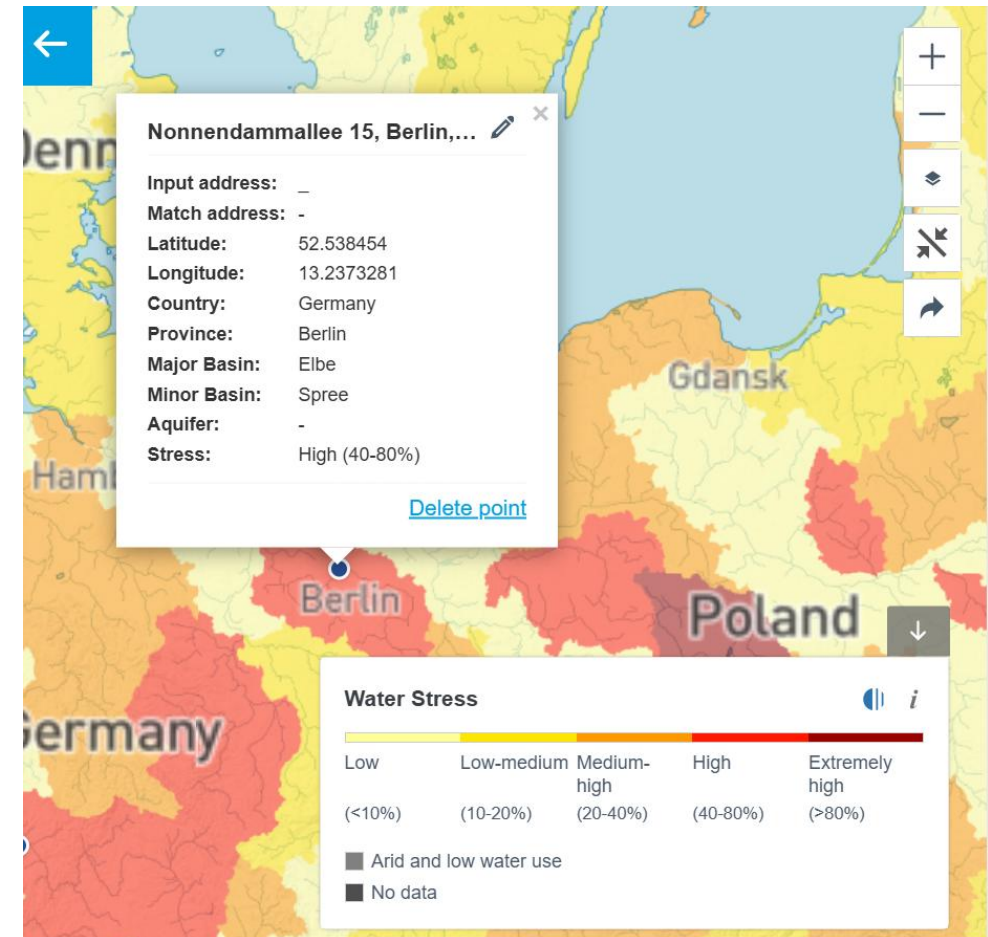

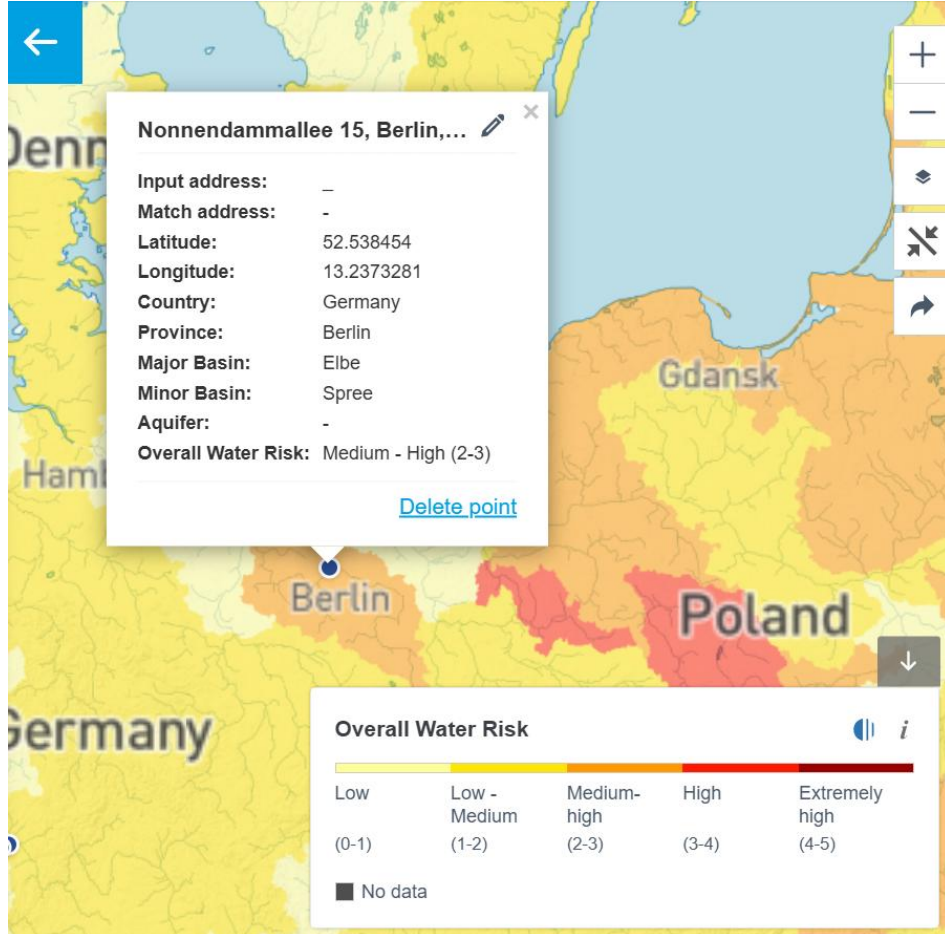

Baseline water stress measures the ratio of total water demand to available renewable surface and groundwater supplies. Water demand include domestic, industrial, irrigation, and livestock uses. Available renewable water supplies include the impact of upstream consumptive water users and large dams on downstream water availability. Higher values indicate more competition among users.

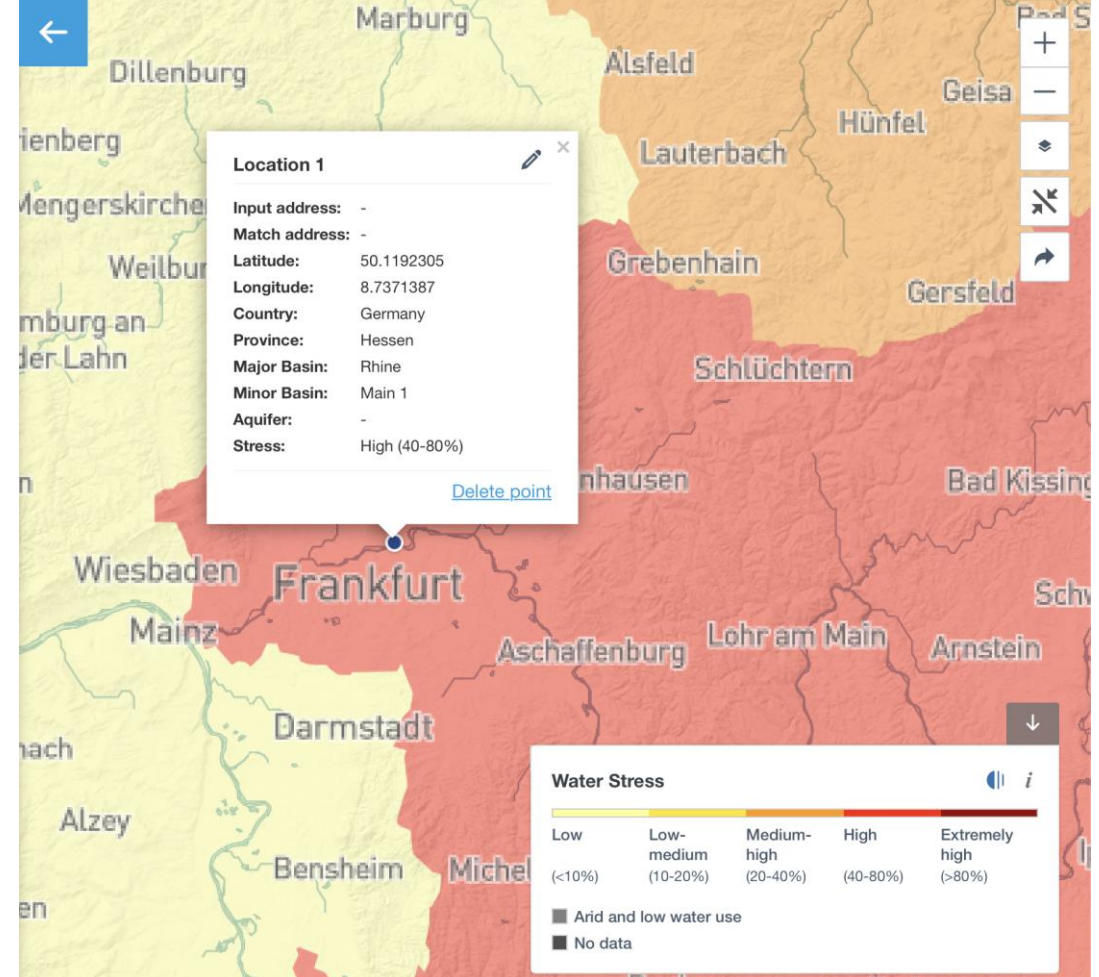

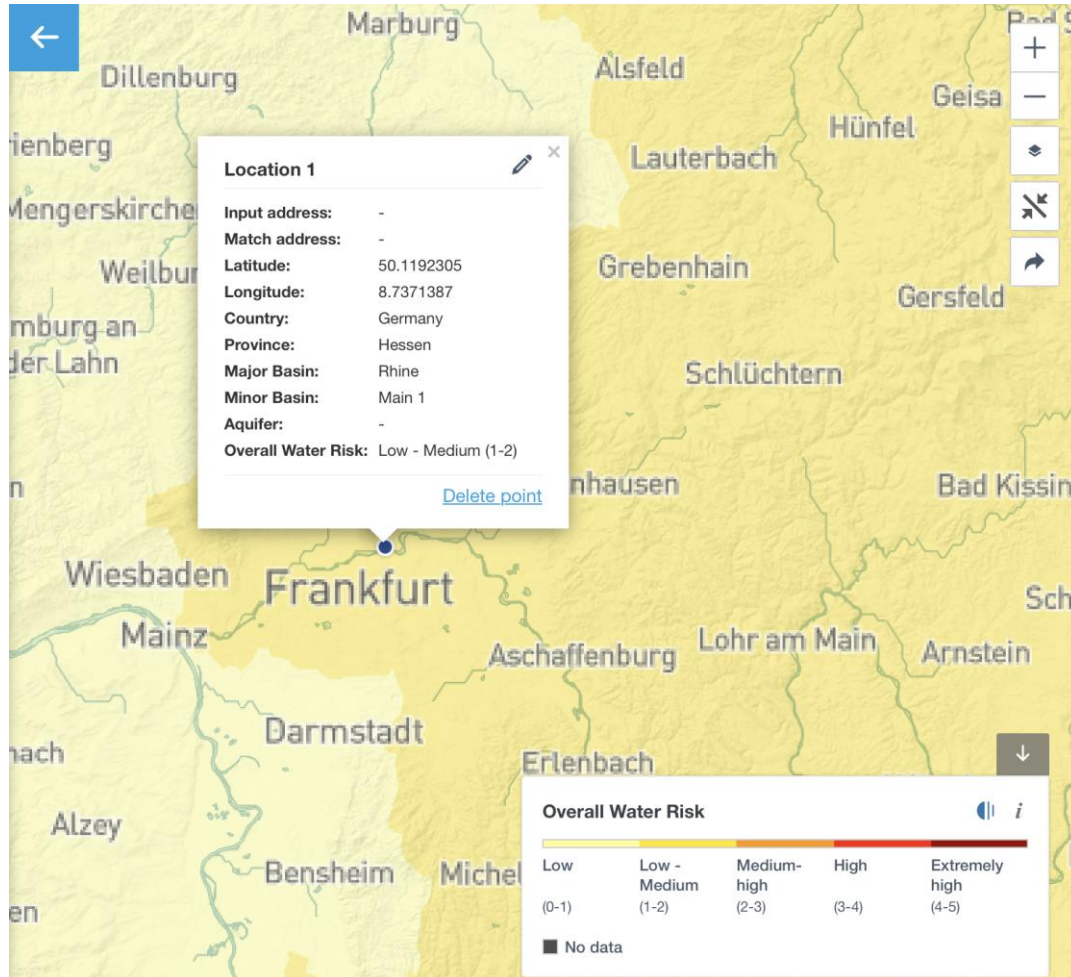

Germany

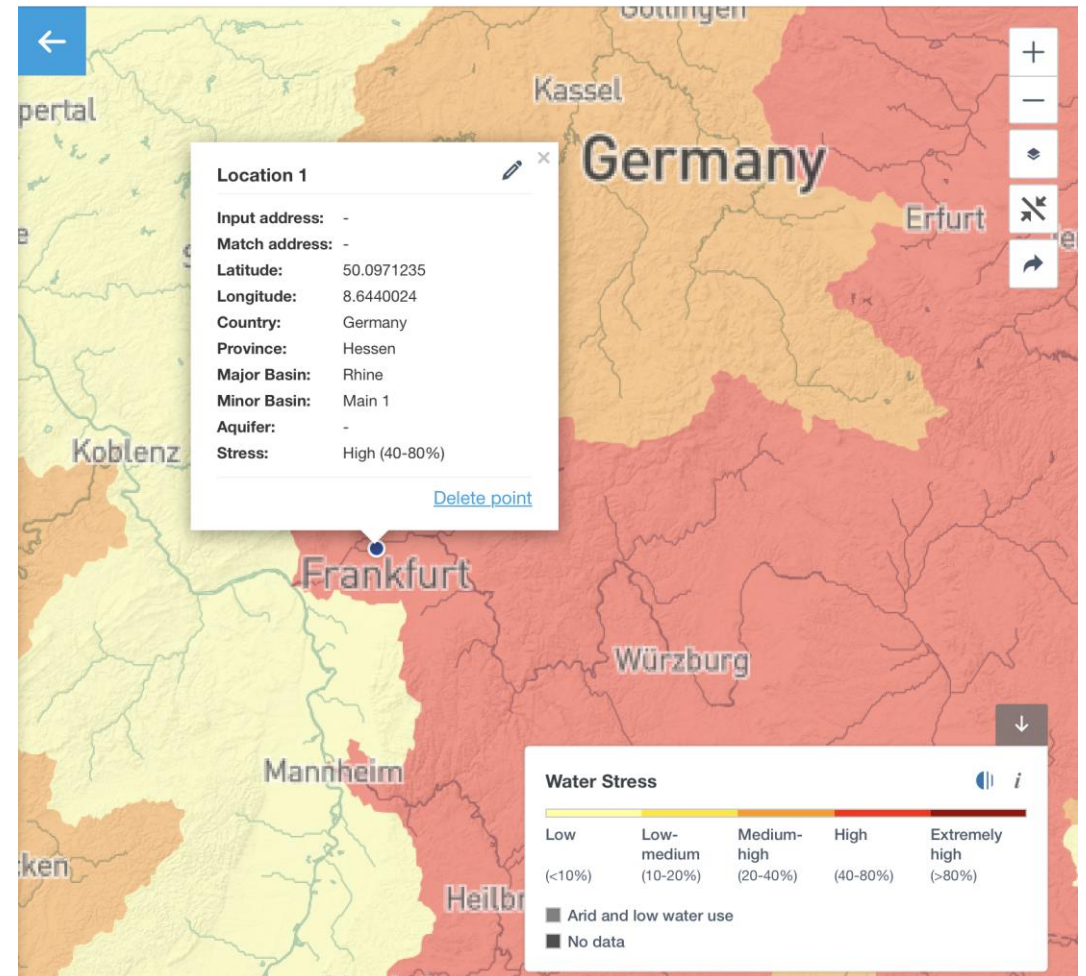

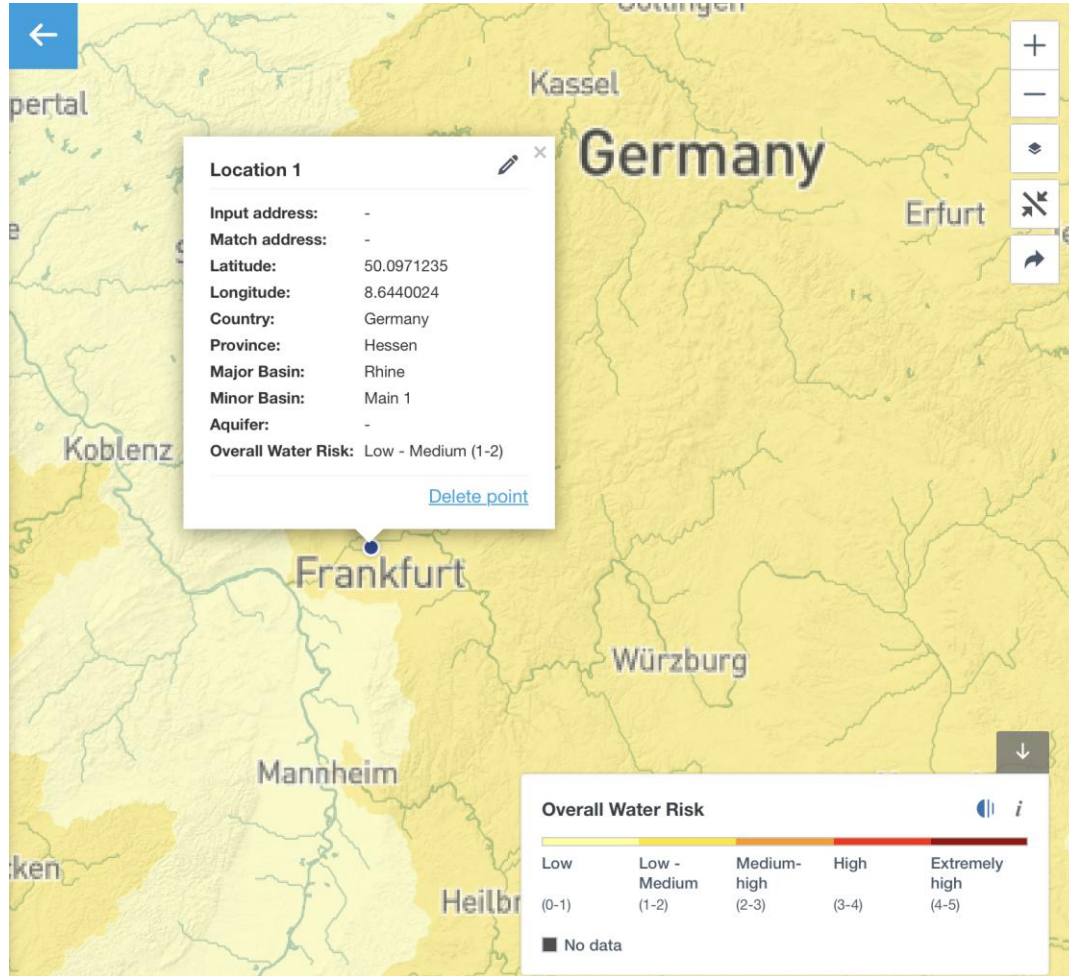

Berlin, Germany

Frankfurt #1, Germany

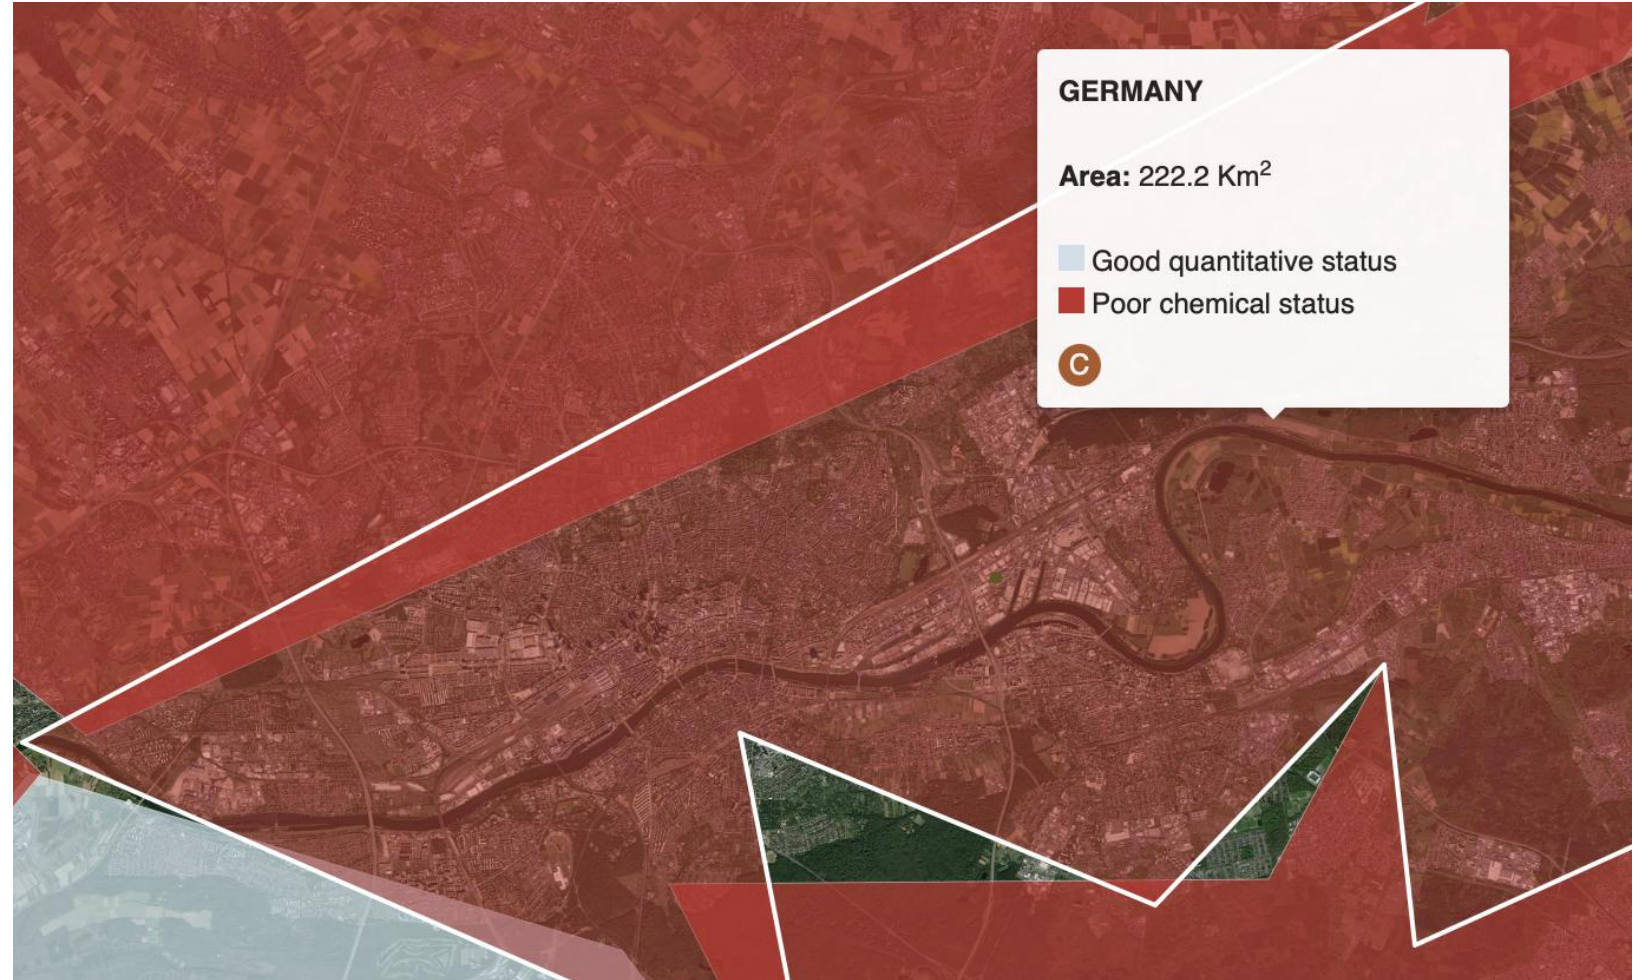

Frankfurt #2, Germany

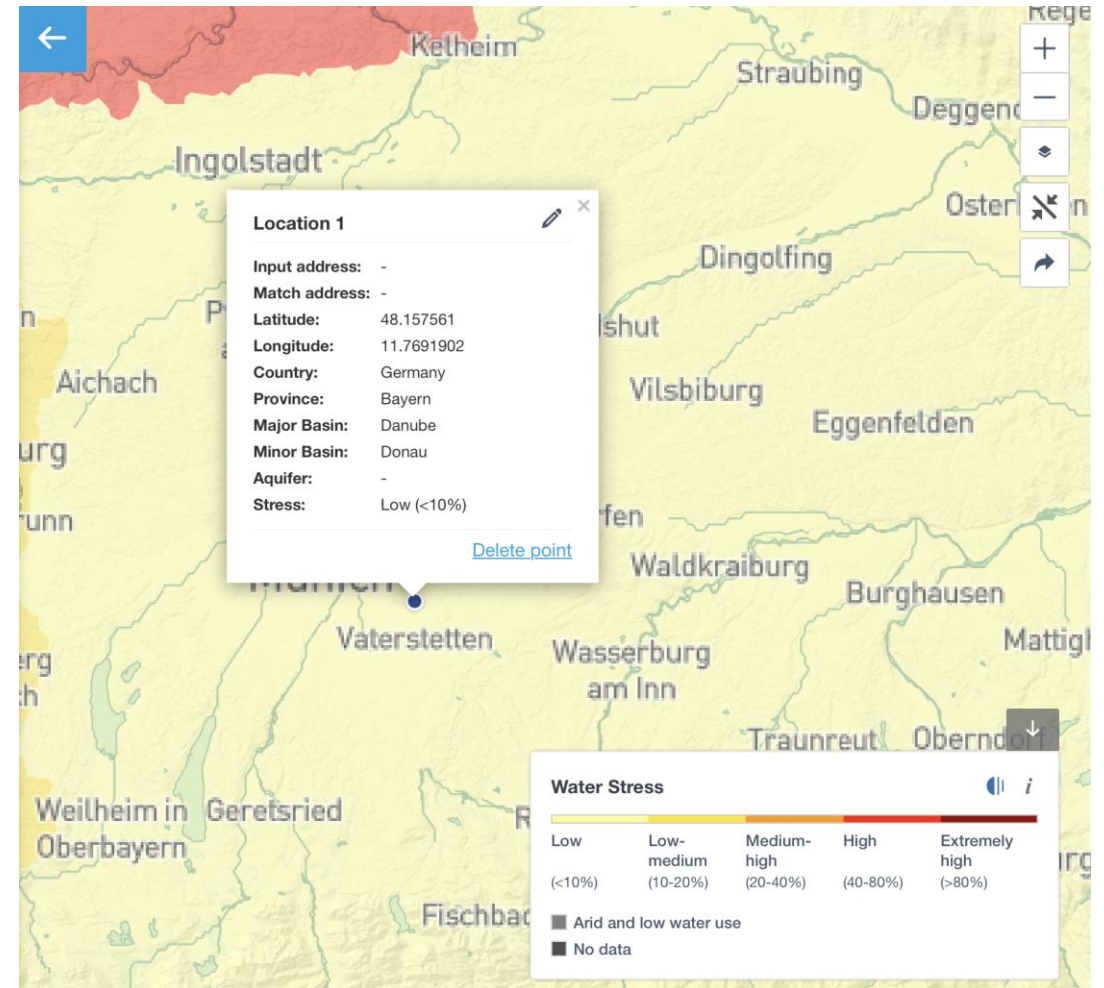

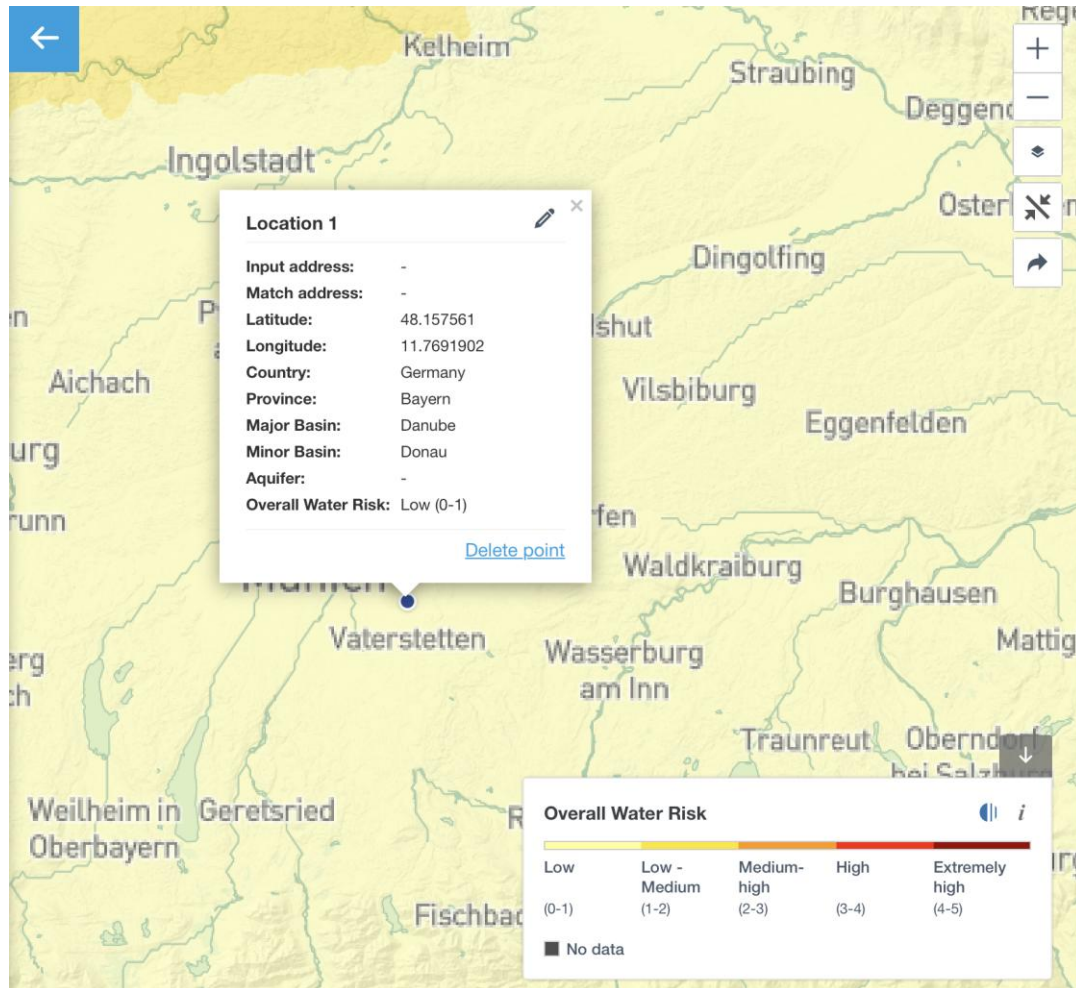

Frankfurt, Germany

STATUS:

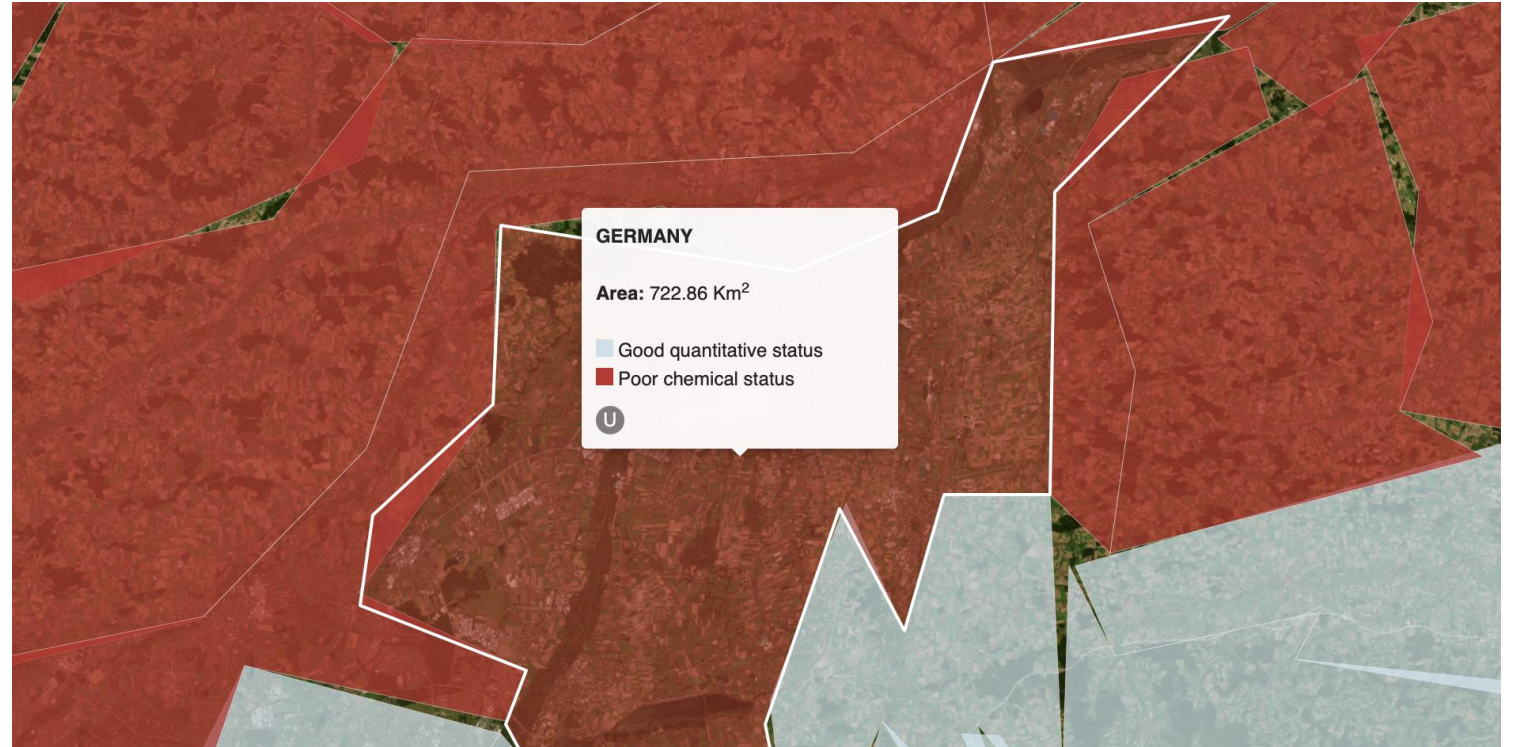

- Chemical pollution other than nutrients (mainly pesticides but also metals, hydrocarbons, etc.) above the legal limit or close and with an upward trend.
- No Drought
- Poor Chemical Status

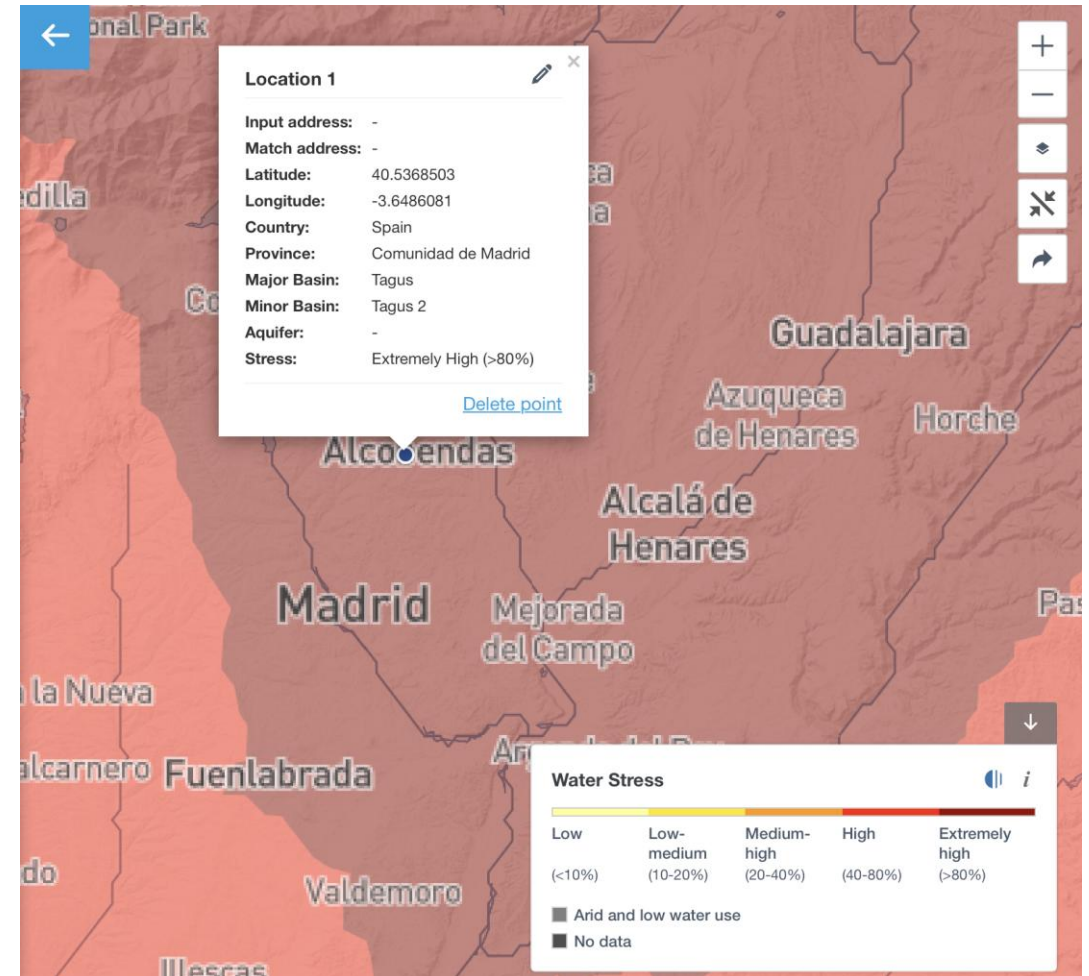

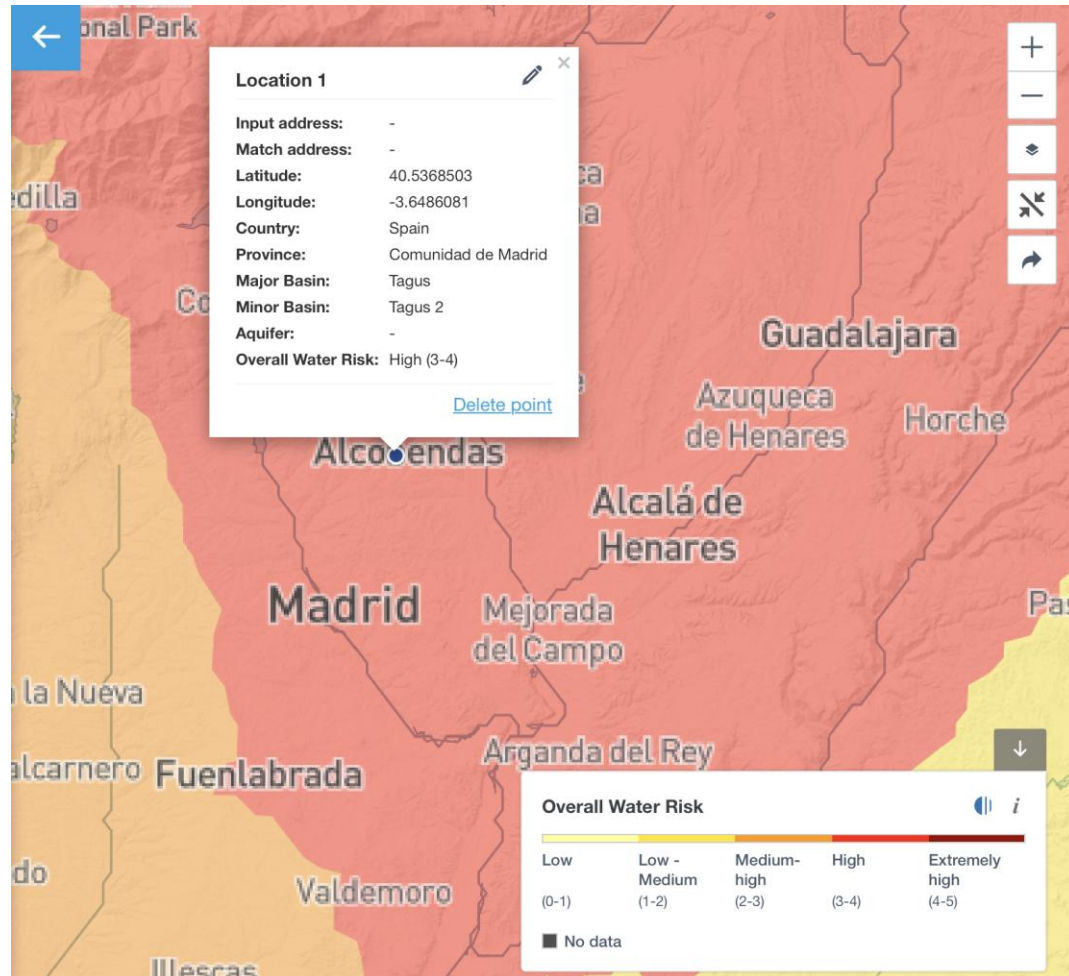

Munich, Germany

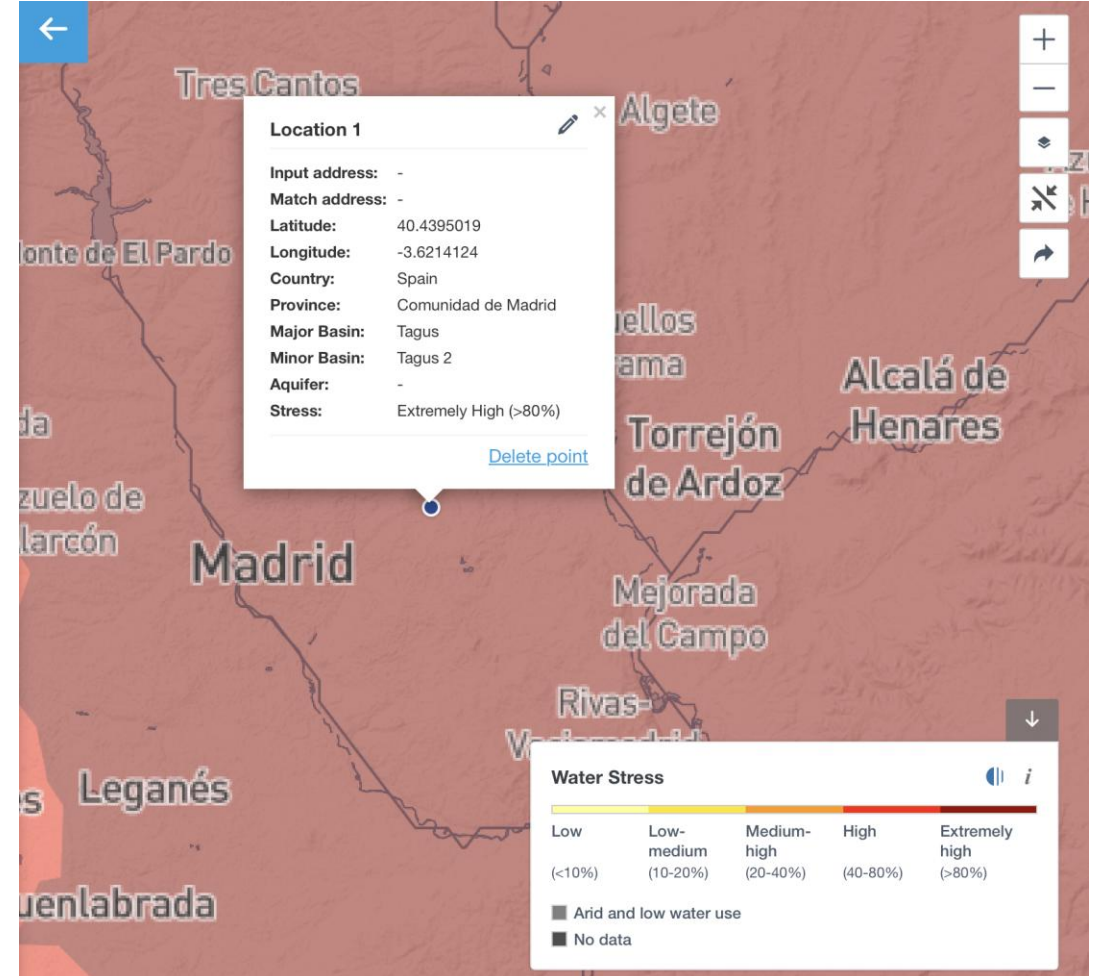

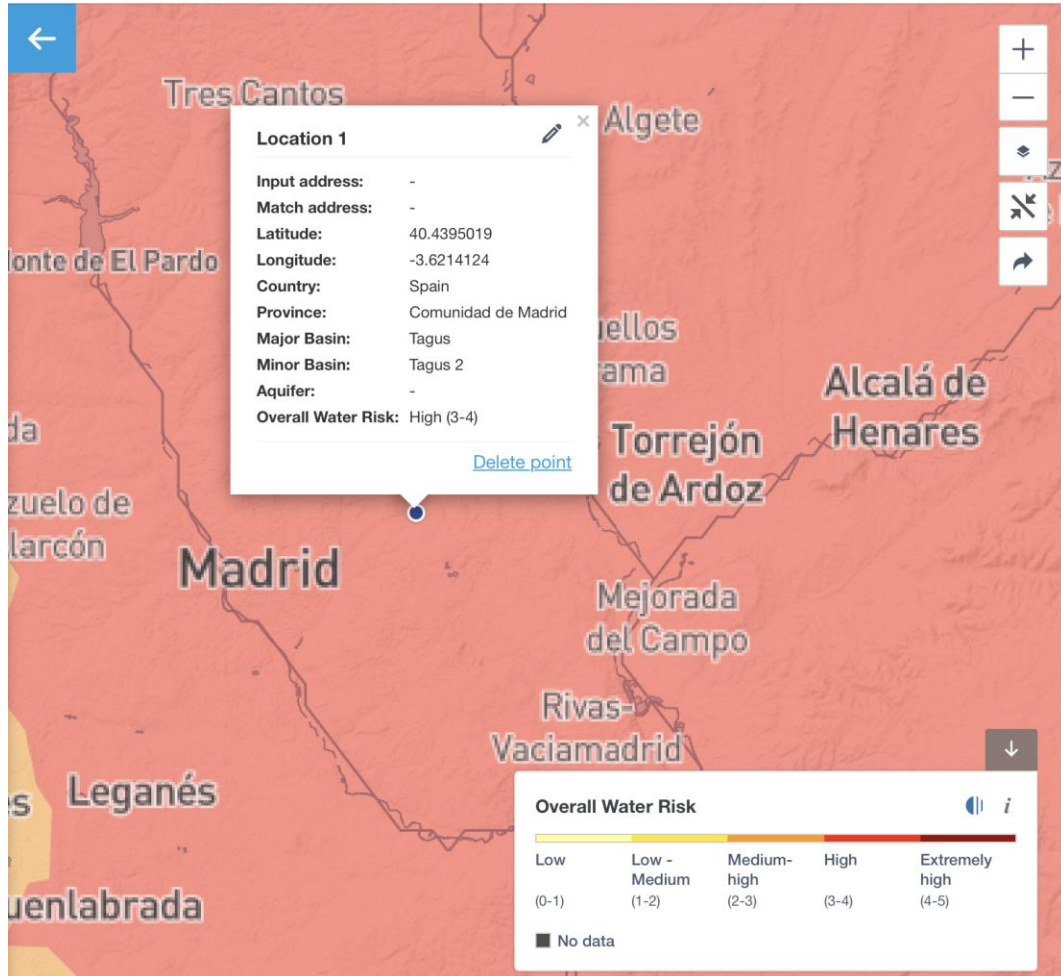

Munich, Germany

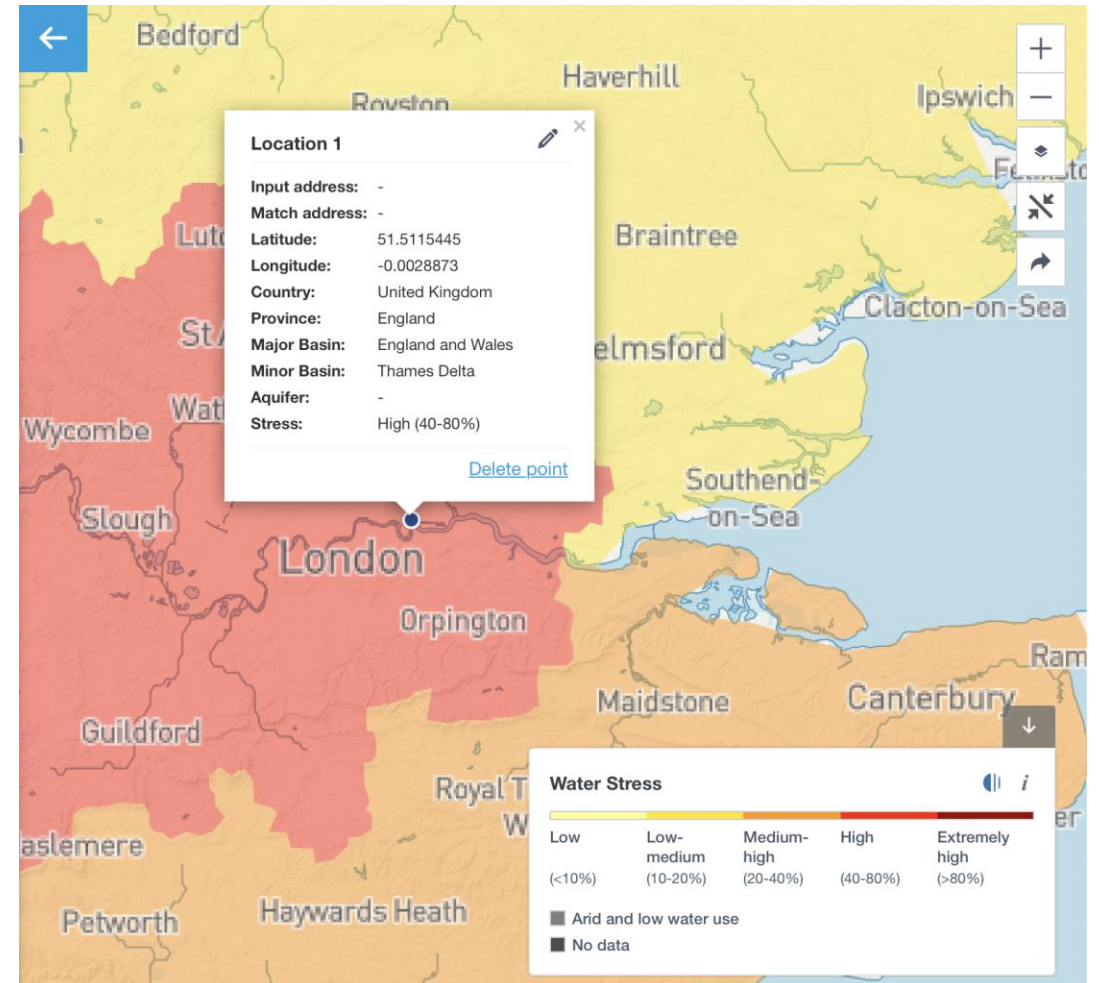

Alcobendas, Spain

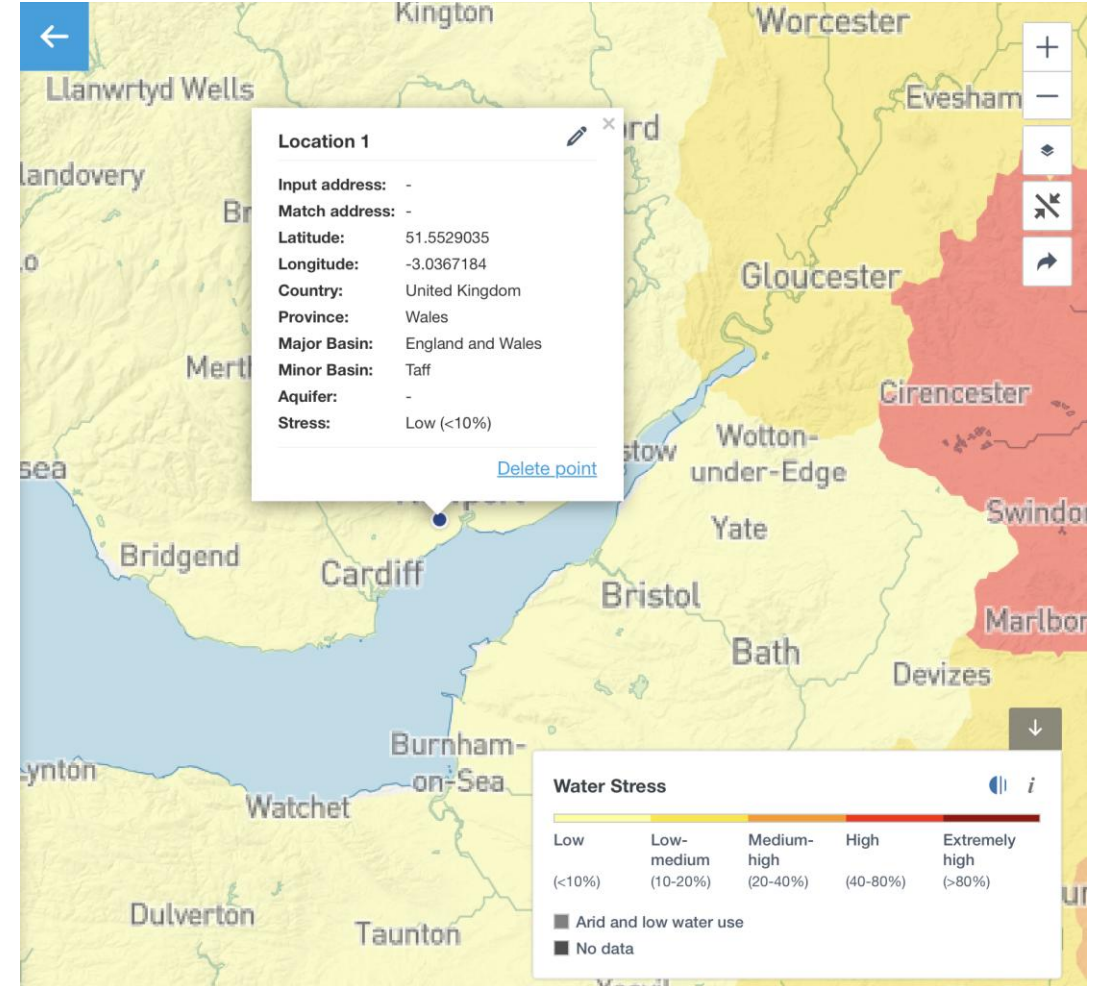

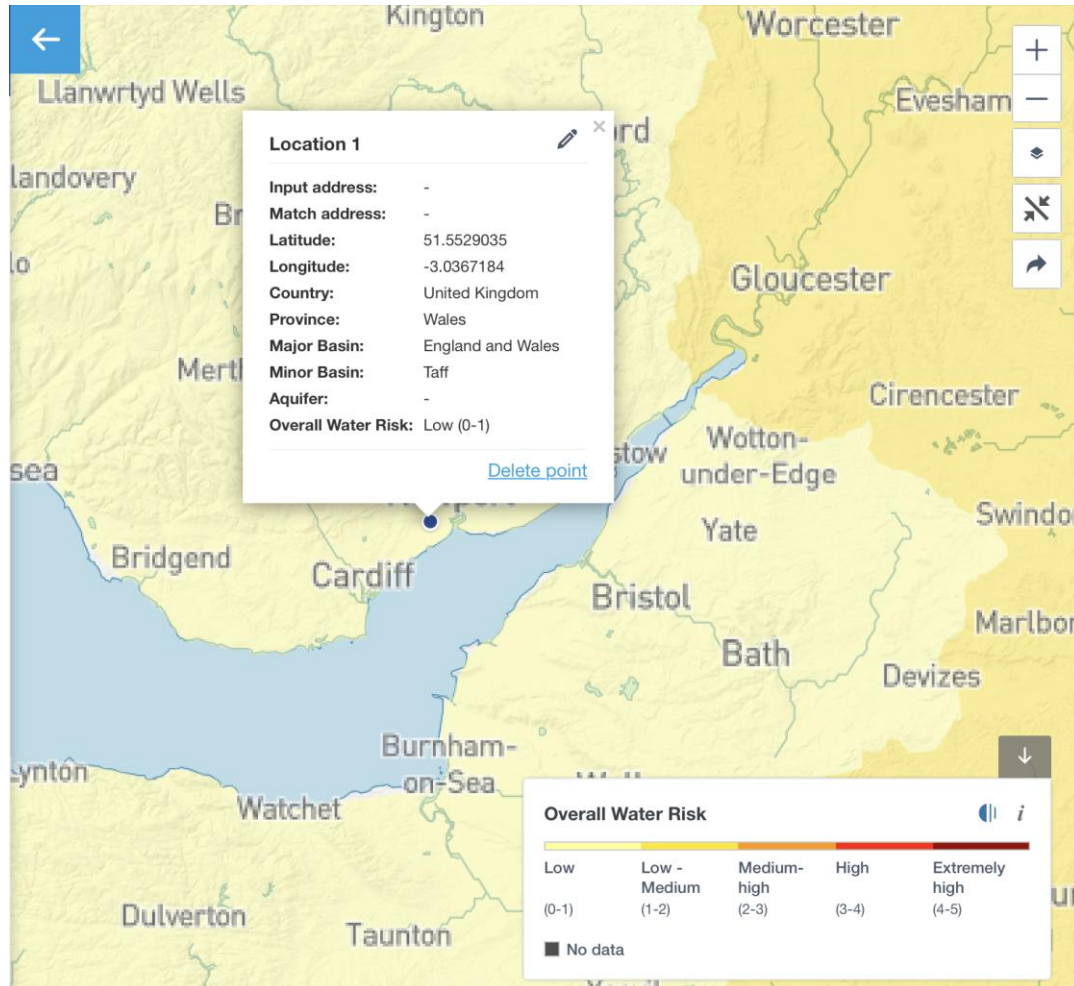

Madrid, Spain

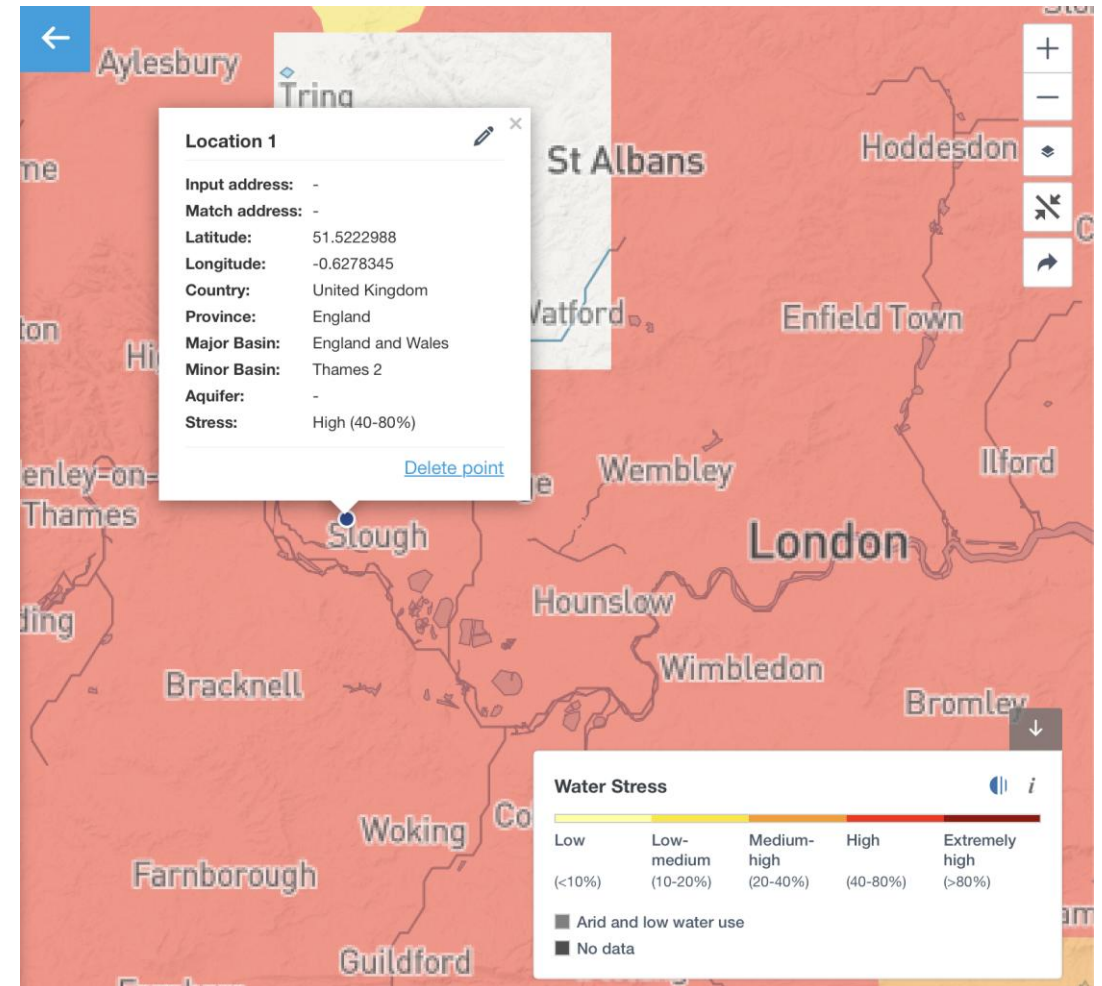

London, United Kingdom

Newport, United Kingdom

Slough, United Kingdom
